SOFTWARE DEVELOPER | WEB, MOBILE & DESKTOP | AI INTEGRATION

SUMMARY

Software developer with a B.A.S. in Application Development who designs and operates production applications across web, Android, and desktop, built by directing AI coding agents. I define requirements and architecture, review the output, and use automated tests and CI as the quality gate: more than 5,000 tests across four shipped projects, with LLM features integrated into real products. Brings over a decade of hardware and software diagnostics to debugging. Available for freelance projects and full-time roles.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Kotlin, Python, Java, C#, SQL

Web and Backend: Next.js, React, Node.js, FastAPI, REST APIs, OAuth and session auth, webhooks, scheduled jobs, Tailwind

Mobile and Desktop: Android, Jetpack Compose, Room, Hilt, WorkManager, Electron, .NET

Data: PostgreSQL, Supabase, SQLite, schema design, versioned migrations, row-level security

AI: Directing AI coding agents (Claude Code, GitHub Copilot), reviewing and validating agent output, Anthropic API integration, prompt design

Quality and Ops: Unit, integration, and instrumented testing, GitHub Actions CI, Vitest, pytest, Sentry, Vercel, Stripe, Git

SOFTWARE DEVELOPMENT

Independent Software Developer | PlusOrMinusTwo Designs | Bothell, WA 2025 – Present

Design and direct production applications built with AI coding agents, owning requirements, architecture, review, testing strategy, releases, and production monitoring.

RidePrint | Live service history and resale verification platform (rideprint.com) 2026 – Present

Next.js, TypeScript, Supabase (PostgreSQL), Vercel, Stripe

- Designed and operate a live full stack platform with Stripe checkout and webhooks, Strava OAuth activity sync, AI receipt OCR through the Anthropic API, and scheduled transactional email.
- 797 automated tests with CI on every push; 48 versioned migrations; hardened with Sentry, row-level security, a nonce-based CSP, and rate limiting.

Postmark | Android SMS and MMS client 2026 – Present

Public on GitHub | Kotlin, Jetpack Compose, Room, Hilt, WorkManager

- Full default SMS replacement with search, media messaging, and scheduled backups; 1,100+ unit tests plus emulator-based instrumented tests in CI; daily driver at 159,000 messages.

ShaftSchematic | Marine prop shaft modeling and drawing export app 2025 – Present

Public on GitHub | Kotlin, Jetpack Compose

- Models multi-segment shafts and exports dimensioned PDF drawings, runout sheets, and wear documents, built from daily shop floor inspection work; 2,200+ unit tests with CI gating merges.

DocArchivist | Local-first document archival desktop app 2025 – Present

Private pre-release, demo on request | Electron, React, TypeScript, Python, FastAPI, SQLite

- React front end with a Python FastAPI backend covering OCR, 22 document types, image-to-PDF ingest, and a Windows installer; 865 automated tests and a nine-phase chaos test plan for ingest resilience.

Hephaestus | Coding agent for repository-level tasks 2026 – Present

In progress, public on GitHub | Python, Anthropic API

- CLI agent that semantically indexes a repository across six languages and uses LLM reasoning to plan development tasks.

PROFESSIONAL EXPERIENCE

Machinist | Sound Propeller Services | Seattle, WA 2022 – Present

- Machine, inspect, and repair marine propellers and shafts to specification, measuring wear and runout and documenting findings; reached proficiency across machining, inspection, welding, and repair with no prior experience.

IT Technician I | Seattle Central Community College | Seattle, WA 2016 – 2021

EasyTech Associate | Staples | Seattle, WA 2012 – 2015

IT Repair Technician (On-Call) | Barrister Global Services | Seattle, WA 2008 – 2011

EDUCATION

Bachelor of Applied Science, Application Development | North Seattle College 2017

Associate of Science, Computer Science | Seattle Central College 2013
